

ARMA | DGS | SEG International Geomechanics Symposium

3-5 November 2020 | Virtual Event

REGISTRATION Early Bird Deadline!

Register by
13 October 2020
and save!

Please email form to
aklerk@seg.org.

PLATINUM & STUDENT REGISTRATION SPONSOR

SILVER SPONSORS

While it is challenging to translate all aspects of the physical event within a virtual environment, we are committed to providing our attendees a unique platform with an immersive event experience to maintain the same depth in knowledge-sharing, engagement and networking, in order to guarantee a comprehensive online experience. Like the physical event, the virtual event will follow the technical program components such as opening & keynote speech, presentations from industry experts, and moderated discussions. The platform offers an optimized and powerful webpage experience – from the comfort of your home or office:

EVENT DESCRIPTION

The symposium will feature speakers including operators, technology developers, and service providers. They will share a wide range of geomechanical knowledge, experience, and challenges. The symposium will also address case studies, technology highlights, and collaborative discussions on geomechanics during the 3 days.

TECHNICAL TOPICS

- In-situ Stresses, Rock, and Natural Fractures
- Drilling Geomechanics
- Hydraulic Fracturing – Observations and Modeling
- Coupled Reservoir Geomechanics
- Field Case Studies: Value of Geomechanics
- New Technologies and AI

WHO SHOULD ATTEND

- Technology developers, practitioners, and researchers from Operators, service providers, universities, and institutes.
- Professionals in geology, geophysics, petrophysics, drilling, Pcompletion, stimulation, reservoir, and production engineering.
