Applications of Machine Learning and AI in Geophysics Workshop

10–13 May 2022 • Virtual

WORKSHOP DESCRIPTION

Applied to geoscience, these data-driven approaches are complementary tools for physical-based modeling, simulation, and inversion. Machine Learning facilitates an understanding of complex relationships among a large and diverse set of variables, valuable for generating and validating models and answering scientific questions. This workshop will discuss the challenges, opportunities, and trends related to the adoption of Machine Learning in Geoscience research and industrial workflows. Professionals from academia, Oil & Gas, and technology will present applications and case studies, promote discussion, and propose practical solutions to take greater advantage of Machine Learning methods.

BECOME A SPONSOR

Sponsorship opportunities are available for this highly-anticipated virtual workshop. A portion of the net proceeds will go to fund student membership in World Bank Tier I, and II countries listed as part of SEG Eurasia Regional Advisory Committee criteria.
