ADVANCING GEOPHYSICAL INNOVATION

The Chinese Petroleum Society (CPS) and the Society of Exploration Geophysicists (SEG) invite you to attend the Beijing 2018 International Geophysical Conference and Exposition, where attendees can network and discover the latest technologies for resource exploration and development in the region while building new relationships with colleagues from around the globe.

TECHNICAL TOPICS

- 01) Seismic data acquisition
- 02) High density, wide azimuth, broadband seismic exploration (including efficient excitation)
- 03) Near surface geophysics & statics correction
- 04) Seismic data processing
- 05) Velocity model building
- 06) Migration imaging
- 07) Seismic interpretation
- 08) Seismic attribute analysis
- 09) Elastic wave forward modeling, inversion and imaging
- 10) Full waveform inversion
- 11) Reservoir geophysics (including reservoir prediction, reservoir characterization, reservoir monitoring, rock physics, time-lapse seismic, etc.)
- 12) Borehole geophysics (including VSP, logging, microseismic and induced seismic monitoring, seismic guided drilling, etc.)
- 13) Multicomponent seismic
- 14) EM exploration and geochemical exploration
- 15) Unconventional oil and gas exploration and development (including tight oil, shale oil and gas, coalbed methane, gas hydrate, etc.)
- 16) Deep geophysical prospecting imaging
- 17) Engineering and mineral geophysics
- 18) Comprehensive study of geology (including geomechanics, exploration and development, risk analysis, exploration history, etc.)
- 19) Big data and high performance computing
- 20) Compressive sensing
- 21) Geophysical information technology and artificial intelligence
- 22) Instruments, equipment, and software
