

**STUDENT REGISTRATION GRANTS NOW AVAILABLE!**  
**Submit your abstract by 15 May 2018**

The SEG Summer Research Workshop, to be held 27–30 August in Galveston, Texas, will include a comprehensive review and exchange on what is possible today by using sensors inside the borehole. Take advantage of the unique opportunity to share your ideas, knowledge, and technical advances in borehole geophysics.

Student registration grants are available with preference given to students who have submitted abstracts.  
**Deadline: 15 May 2018**

Topics include:

- Drilling applications
- Salt challenge applications
- Imaging in complex areas
- Non-conventional, multicomponent or time-lapse recording
- Borehole microseismic
- Borehole non-seismic methods
- Reservoir engineering and monitoring applications (like, but not limited to, carbon capture usage and storage, EOR, reservoir and caprock integrity, and production enhancement)

Visit [seg.org/events/AABG18](http://seg.org/events/AABG18) for more information and abstract submittal guidelines.  
*Grants are supported through the SEG Foundation.*
