

REALIZING THE ENERGY POTENTIAL OF ANGOLA SYMPOSIUM

16–18 MARCH 2026 • LUANDA, ANGOLA

INVITATION

Dear

Thank you for your interest in attending the Society of Exploration Geophysicists (SEG) **Workshop on Realizing the Energy Potential of Angola Symposium** being held from 16–18 March 2026.

Innovation in technology and integration across various geoscience disciplines are required to solve subsurface challenges, thus resulting in successful exploration campaigns in these basins. The symposium will focus on maximising the resource potential of these basins through geoscience and the integration of multidomain data to overcome exploration-based challenges. Lessons learned from analogue basins along the conjugate African and South American margins will inform many new exploration strategies. There are also emerging projects in that have the potential to reshape Angola's future energy and economic landscape.

Please go to Angola Consulate (<https://angolaconsulate.ae/visa-section/apply-for-a-visa/>) for more details on visa application and requirements for your nationality.

We understand that you will bear all expenses related to your visit. SEG is not able to contact the embassy or any government agencies on your behalf; this is your responsibility.

We look forward to seeing you in Luanda, Angola.

Sincerely,

SEG Workshop Organizers
