2nd Advances in Geophysical Solutions for Complex Geological Settings Workshop

30 June–2 July 2026 • Kuala Lumpur, Malaysia

WORKSHOP OVERVIEW:

This workshop is especially timely as the global energy transition demands more efficient discovery of hydrocarbons and alternative energy source, deployment of carbon capture and storage (CCS), and search for critical mineral resources, all of which require innovative geophysical approaches in complex settings.

TECHNICAL TOPICS:

- Advances in Data Acquisition Technologies
- Case Studies from Complex Geological Settings
- Enhanced Data Processing and Imaging
- Machine Learning and Artificial Intelligence
- Sustainability and Environmental Applications

VENUE:

InterContinental Hotel, Kuala Lumpur, Malaysia

WHO SHOULD ATTEND:

- Academia, university and research consortia
- Exploration, development and production geoscientists
- Geophysical acquisition, processing, imaging and inversion practitioners
- Geophysical equipment manufacturers - seismic, non-seismic and borehole
- New energy geoscientists – for CCS, geothermal, mining and other applications
